Dean A. Monco Biographical Information

I have litigated and/or tried dozens of cases in all aspects of intellectual property law, involving patent, trademark and copyright infringement, as well as theft of trade secrets. The subject matter has included computer software, monoclonal antibodies and recombinant DNA techniques used to produce increased supplies of factor VIII plasma protein, lasers used for skin resurfacing, and methods for producing carbon fiber sheets having controlled surface resistivities used to produce low-observable "stealth" capabilities on the B-2 Bomber and F-22 Fighter Plane.

EDUCATION:

J.D. - DePaul University, 1979
